Thanks Angela. Either Dave or I can get back to Doug.

The issue raised in the petition has to do with nutrients only, not the temperature issues in the TMDL or downstream SSC. We drafted in interim response (attached), which should have gone out under Dennis' signature by now, but I have not seen a signed copy.

Subject: Snake River TMDL petition

Hi Dave and Leigh,

We met with IDEQ today to discuss WQS priorities. Doug Conde asked if we knew anything about the recent petition we received asking us to reopen the Snake River/Hells Canyon TMDL. He'd like to know if we are thinking of responding, when that could happen, and what our response may be. I told him I would relay the request to you. Can you contact him?

And can you give me a short summary as well. Is this a temp TMDL and is there any relationship to the Hells Canyon SSC that IDEQ submitted to us that we have not yet acted on? Thanks.
